Although we do our best to ensure that every item we send out contains the hardware necessary for assembly, there will be situations when installer will need extra parts. To cover this, Heartwood supplies its dealers with a Care Pack that can be sent out on each installation job, containing all the hardware we use on a regular basis. This system can save us time, money and reputation.

When you run low on parts in your Care Pack, rather than replace the entire Care Pack each time, we ask that you use this form and check the re-order box beside the items you require to refill your Care Pack. This form contains a complete list of hardware etc. that we put into every Care Pack we use. Please check off the items that you require, fax this form to HDL and we will send them to you with your next shipment
